

Welcome to Selenium Web drivers

WebDriver

- WebDriver is an Interface
- Control of the browser itself
- Selection of WebElements
- Debugging aids

WebDriver

Introducing WebDriver's Drivers

- **HtmlUnit Driver**

Note: additional steps are required to use

- **Firefox Driver**

- **InternetExplorer Driver**

- Chrome Driver,

- Opera Driver,

- Safari Driver

- Edge Driver

- Android Driver

- iPhone Driver

-
- **HtmlUnit Driver:** This is currently the fastest and most lightweight implementation of WebDriver. As the name suggests, this is based on HtmlUnit. HtmlUnit is a java based implementation of a WebBrowser without a GUI.

- **WebDriver driver =new HtmlUnitDriver();**

Same Way:

- **WebDriver driver =new FirefoxDriver();**
 - **WebDriver driver =new InternetExplorerDriver();**
 - **WebDriver driver =new ChromeDriver();**
-

Working With Chrome Browser:

Configuration Steps:

- Go to selenium webSite
- Go to downloads
- Click on browsers
- Focus on Chrome and Click on Documentation
- Download Chrome Driver Zip file based on our browser version
- Download Chrome driver Win 32

Chrome Driver Package:

```
import org.openqa.selenium.chrome.ChromeDriver;
```
